

Table Number	Page	Description
1.3	34	SI derived Units
1.4	35	Multiplying Prefixes
1.5	43	Heat Transfer Processes
2.2	83	BC for heat diffusion eq @ surface
3.3	132	1D, steady state solutions to heat eq w/ no generation
3.4	150	Uniform CS in fins Temp distr. And heat rates
3.5	157	Common Fin Shape Efficiencies
4.1	215	Conduction Shape Factors & Dimless conduction heat rates
4.2	226	Nodal finite-difference eqs
5.1	275	Transient 1D Conduction coefficients
5.2	295	Transient Heat Transfer Results
5.3	308	Transient 2D finite-difference eqs

6.1	364	Boundary layer equations
6.2	373	Dimensionless Equations of Heat & Mass Transfer
6.3	375	Relations pertinent to boundary layer analogies
6.7.3	381	Reynold's Analogy section
7.2	420 (nice)	Constants for circular cylinder in cross flow (based off eq 7.52)
7.3	421	Constants for Noncircular cylinders in cross flow
7.4	421	Constants for circular cylinder in cross flow (based off eq 7.53)
7.5	432	Constants for tube bank in cross flow
7.7	446	Summary of convection heat transfer correlations for external flow
N/A (CH. 8)	496	Nusselt equation for Turbulent in circular tube
8.1	505	Nusselt Numbers and Friction Factors for fully developed laminar flow in tubes
8.3	507	Influence Coefficients for fully developed laminar in circular tube w/ uniform heat flux
8.4	519	Summary of convection correlation for flow in circular tube

N/A (CH. 9)	556	Upper and Lower surface Nusselt equations
11.3	664	Heat Exchanger Effectiveness Relations
11.4	665	Heat Exchanger NTU Relations
N/A (CH. 11)	666-667	Heat Exchanger Effectiveness Graphs
789-790	13.1	View Factors for 2D geometries
791	13.2	View Factors for 3D geometries
809	13.3	Special Diffuse, gray, two-surface enclosures
A.6	919	Properties of Saturated Water
